Determine allocation of income, losses, and deductions in the termination year of the S corporation. Plus, there are citations to the controlling rules, regulations, and court decisions that will save you hours of research.

Gender(s) Kathryn Bond Stockton 2021-08-31 Why gender is strange, even when it's played straight, and how race and money are two of its most dramatic ingredients. In this volume in the MIT Press Essential Knowledge series, Kathryn Bond Stockton explores the fascinating, fraught, intimate, morphing matter of gender. Stockton argues for gender's strangeness, no matter how "normal" the concept seems; gender is queer for everyone, she claims, even when it's played quite straight. And she explains how

race and money dramatically shape everybody's gender, even in sometimes surprising ways. Playful but serious, erudite and witty, Stockton marshals an impressive array of exhibits to consider, including dolls and their new gendering, the thrust of Jane Austen and Lil Nas X, gender identities according to women's colleges, gay and transgender ballroom scenes, and much more. Stockton also examines gender in light of biology's own strange ways, its out-of-syncness with "male" and "female," explaining attempts to fortify gender with clothing, language, labor, and hair. She investigates gender as a concept--its concerning history, its bewitching pleasures and falsifications--by meeting the moment of where we are, with its many genders and counters-to-gender. This compelling background propels the question that drives this book and foregrounds race: what is "the opposite sex," after all? If there is no opposite, doesn't the male/female duo undergirding gender come undone?

Economic Growth And Transition: Econometric Analysis Of Lim's S-curve Hypothesis

Hui Ying Sng 2010-04-16 This book is the first of its kind to systematically analyze and

apply Lim Chong Yah's S-Curve Hypothesis to the various facets of economic growth

and economic transition. By augmenting the mathematical and economical sophistication of the hypothesis, this book extends the S-Curve hypothesis to provide further insight into economic growth and transition. It also utilizes a construction of a stochastic growth model to provide the microeconomic foundation for the S-Curve hypothesis. This model resolves the puzzle of why some developing countries experience economic take-off, while others do not. The book analyzes and extends discussion on the S-Curve, and also applies the S-Curve hypothesis to predict long-term growth in Japan and Singapore. It serves as an excellent resource for people interested in Lim's growth theory.

Watching M\*A\*S\*H, Watching America James H. Wittebols 2003-06-05 It has been said that M\*A\*S\*H was a show set in the 1950s which reflected the shifting values of the 1970s and early 1980s. Hawkeye Pierce, Radar O'Reilly, Trapper John McIntyre, Sherman Potter, Margaret (Hot Lips) Houlihan, B.J. Hunnicutt, Frank Burns, Charles Emerson Winchester, Max Klinger--these and the many other characters who populated the MASH 4077 used the Korean War as a backdrop to comment on many of the social issues of their day. Using a unique blend of comedy and drama, the show's first three seasons (1972-1975) focused on the anti-Vietnam War sentiment that consumed much of America. As Vietnam ended, M\*A\*S\*H moved on to concentrate on other contemporary issues--the women's movement, the rise of the religious right in

American politics, the new narcissism that marked the early 1980s, the heightened awareness of underage or excessive alcohol use, and the increased emphasis on family in American life. How the series presented these issues and its success in doing so are the subjects of this critical study. An episode listing--brief plot outline, casts and credits, air dates, and titles--is also provided.

The Witchery S. Isabelle 2022-07-26 “The Witchery is a dark, delicious delight. S. Isabelle is a debut to watch.” --Justina Ireland, New York Times bestselling author of Dread Nation The Haunting Season is here and the Wolves are awake. Haelsford, Florida, is a hellmouth. Or at least, that’s what Logan, a new witch struggling to control her powers, thinks when she arrives at Mesmortes Coven Academy. She is immediately taken under the wing of the infamous Red Three: Iris, a deathwitch, who wants nothing more than to break the town’s curse; Thalia, the talented greenwitch, on the run from her religious family and a past that still haunts her; and Jailah, one of the most extraordinary witches at the academy whose thirst for power may lead her down a dark path. With the Haunting Season approaching, Wolves will soon rise from the swamp to kill, and the humans and witches must work together to survive the yearly onslaught. However, the history between humans and witches is long and bloodied, with the current truce hard-won and hanging in the balance. And this year, the stakes couldn’t be higher as two boys from Hammersmitt School prepare to make their first sacrifices to the witches in exchange for protection. But when students start turning up dead, Iris, Thalia, Jailah, and Logan realize they’ll have to harness their powers and stop the Wolves themselves. Yet old dangers lie in wait, and the cost to break the curse may be greater than any witch or human could ever know...

Ship of Theseus Jeffrey Abrams 2013 One book. Two readers. A world of mystery, menace and desire A young woman picks up a book left behind by a stranger. Inside it are his margin notes, which reveal a reader entranced by the story and by its mysterious author. She responds with notes of her own, leaving the book for the stranger, and so begins an unlikely conversation that plunges them both into the unknown. THE BOOK: Ship of Theseus, the final novel by a prolific but enigmatic writer named V. M. Straka, in which a man with no past is shanghaied onto a strange ship with a monstrous crew and launched on a disorienting and perilous journey. THE WRITER: Straka, the incendiary and secretive subject of one of the world's greatest mysteries, a revolutionary about whom the world knows nothing apart from the words he wrote and the rumours that swirl around him. THE READERS: Jennifer and Eric, a college senior and a disgraced grad student, both facing crucial decisions about who they are, who they might become, and how much they're willing to trust another person with their passions, hurts and fears. S., conceived by filmmaker J.J. Abrams and written by award-winning novelist Doug Dorst, is the chronicle of two readers finding each other in the margins of a book and enmeshing themselves in a deadly struggle between forces they don't understand. It is also Abrams and Dorst's love letter to the written

word.

McQuail's Mass Communication Theory Denis McQuail 2010-02-28 "Denis McQuail's Mass Communication Theory is not just a seminal text in the study of media and society - it is a benchmark for understanding and appreciating the long and winding road people and their media have taken to get us here." - Mark Deuze, Indiana University and Leiden University "This is a unique work tested by time and generations of students around the world - North, South, East and West." - Kaarle Nordenstreng, University of Tampere "McQuail's Mass Communication Theory continues to be the clearest and best introduction to this sprawling field." - Anders Hansen, University of Leicester With over 125,000 copies sold, McQuail's Mass Communication Theory has been the benchmark for studying media and communication for more than 25 years. It remains the most authoritative and comprehensive introduction to the field and offers unmatched coverage of the research literature. It covers everything a student needs to know of the diverse forms of mass communication today, including television, radio, newspapers, film, music, the internet and other forms of new media. Denis McQuail shows that more than ever, theories of mass communication matter for the broader understanding of society and culture. Unmatched in coverage and used across the globe, this book includes: Explorations of new media, globalization, work, economy, governance, policy, media audiences and effects New boxed case studies on key research publications, to familiarize students with the critical research texts in the field

Definitions, examples, and illustrations throughout to bring abstract concepts to life. McQuail's Mass Communication Theory is the indispensable resource no student of media and communication studies can afford to be without.

Measurements of Higgs Boson Properties in Proton-Proton Collisions at  $\sqrt{s} = 7, 8$  and 13 TeV at the CERN Large Hadron Collider Ulascan Sarica 2019-09-26 This thesis documents the measurement of lifetime, width, mass, and couplings to two electroweak bosons of the recently-discovered Higgs boson using data from the CMS experiment at the Large Hadron Collider. Both on-shell (at the mass of around 125 GeV) and off-shell (above 200 GeV) Higgs boson production is studied and an excess of off-shell production with significance above two standard deviations is observed for the first time. The latter is a qualitative new way to study the Higgs field, responsible for generation of mass of all the known elementary particles. In addition, phenomenological tools have been developed with the Monte Carlo event generator and matrix element techniques for an optional analysis of LHC data. Optimization of the CMS data with careful alignment of the silicon tracker is also presented.

Savoia-Marchetti S.79 Sparviero Bomber Units Marco Mattioli 2018-02-22 Initially developed by Savoia-Marchetti as a transport, the aircraft had evolved into a dedicated medium bomber by the time the S.79-I made its combat debut in the Spanish Civil War in 1936. During World War 2, it became Italy's most successful bomber, and the most produced, with around 1370 built between 1936 and early 1944. Although initially hampered by poor tactics, the S.79 bomber crews nonetheless scored sunk a number of Allied vessels, and provided a constant threat to Allied sailors in the Mediterranean in the early stages of the war. In East Africa and the Red Sea the Sparvieri were the most modern bombers in-theatre, proving a challenge to RAF and SAAF biplane fighters. Using specially commissioned full-colour artwork, first-hand accounts and historic

photographs, this volume chronicles the history of the S.79's war in the Mediterranean, North African, Balkan, and East African theatres.

Functional Structure(s), Form and Interpretation Andrew Simpson 2006-03-03 The issue of how interpretation results from the form and type of syntactic structures present in language is one which is central and hotly debated in both theoretical and descriptive linguistics. This volume brings together a series of eleven new cutting-edge essays by leading experts in East Asian languages which shows how the study of formal structures and functional morphemes in Chinese, Japanese and Korean adds much to our general understanding of the close connections between form and interpretation. This specially commissioned collection will be of interest to linguists of all backgrounds working in the general area of syntax and language change, as well as those with a special interest in Chinese, Japanese and Korean.
